SKILLS

- **PRECISION & PROBLEM-SOLVING**
 - Clean code and systematic resolution of complex problems
- **AI-ENHANCED PRODUCTIVITY**
 - Accelerated development with AI tools and rapid learning
- **TEAMWORK & COMMUNICATION**
 - Effective collaboration and customer/UX orientation
- **PRESSURE MANAGEMENT**
 - Efficient multitasking under tight deadlines
- **ADAPTABILITY & INNOVATION**
 - Flexibility with emerging technologies and creative approaches
- **PROJECT MANAGEMENT**
 - Full project lifecycle management from concept to deployment

LANGUAGES

- Italian (Native)
- English (Advanced Technical)
 - Game dev community, APIs, documentation, AI tools

PROFILE

I'm a self-taught Software, Mobile, and Game Developer with a strong drive for innovation.

Over time, I've developed solid skills in full-stack development, AI integration, and mobile app creation – including a complete, self-built innovative app project.

I'm constantly learning, experimenting, and improving, driven by genuine passion for technology and creativity.

EDUCATION & LEARNING

SELF-TAUGHT | PRESENT

- Technology Mastery: Multi-language (Java, Python, C++, JavaScript)
- Architecture Skills: Microservices, full-stack integration, performance optimization
- AI Integration: Specialization in human-AI collaborative development

FRONT-END COURSE | SEPTEMBER 2025| COMPLETED

- 160-hour Front-End course offered by Riverloop, funded by Formatemp, with a certified certificate awarded.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

- Java 17 - Spring Boot 3.2, Spring Data JPA, REST APIs, microservices
- Python 3.11+ - Flask, machine learning, AI algorithms
- JavaScript ES6+ - Async/await, DOM manipulation, SPA development
- TypeScript (ESNext/v5) - static typing, interfaces/generics, utility
- C/C++ - SDL2, game development, memory management, STL
- HTML5/CSS3/Tailwind - Responsive design, advanced animations
- Dart/Flutter - Cross-platform mobile, UI/UX, state management
- React: development of reusable components, state management with Hooks and Context API, integration of external libraries.
- Next.js: SSR and SSG, API Routes management, performance and SEO optimization.

SPECIALIZATIONS

- Full-Stack Development - Frontend/backend integration, microservices
- Game Development - SDL2, 2D rendering, performance optimization
- AI Integration - Machine learning, recommendation systems, OpenAI APIs
- Mobile Development - Flutter cross-platform, Firebase integration

TOOLS & METHODOLOGIES

- Git/GitHub, Maven, VS Code, Android Studio
- AI-assisted development (GitHub Copilot, ChatGPT)
- Architecture patterns (MVC, Repository, Service Layer)
- Database design (SQL, JPA/Hibernate)

PROFESSIONAL EXPERIENCE

Strong work experience across multiple sectors, contributing to the development of key transferable skills: technical accuracy, pressure management, effective teamwork, customer orientation, and adaptability.

PORTFOLIO PROJECTS

TRAVEL MATE | Front-End Web App | 2025

- Travel web app using Next.js 15 and TypeScript for destination discovery and itinerary planning.
- Implemented server-side API routes for geocoding, weather, and image sourcing (Geoapify, OpenWeather, Unsplash/Pexels) with resilient fallbacks.
- Optimized images and performance using Next.js Image, remotePatterns, and lazy-loading strategies.
- Developed responsive UI with Tailwind CSS and accessible animations via Framer Motion; global state managed with React Context and localStorage.

WEB CINEMA AI PRO | Full-Stack Enterprise Application | 2025

Movie recommendation system with microservices architecture

- Backend: Java Spring Boot 3.2, Spring Data JPA, REST APIs
- AI Engine: Python Flask, machine learning, recommendation algorithms
- Frontend: JavaScript ES6+, responsive design, real-time filtering
- Architecture: 3-tier microservices communication (ports 3001/8080/5001)
- Features: Rating system, autocomplete search, user data persistence

DREAM VISUALIZER | Flutter Mobile AI App | 2025

Innovative AI-powered mobile application

- OpenAI API integration – GPT-4 for NLP, DALL-E for procedural art generation
- Advanced mobile features – biometric authentication, speech-to-text, real-time processing
- Secure architecture – API key management, encrypted storage
- Cross-platform deployment with multilingual interface
- Firebase backend integration for cloud services

TETRIS GAME ENGINE | Game Development C/C++ | 2025

Full game engine implementation with multiple architectures

- Two complete versions: Procedural C and Object-Oriented C++
- SDL2 integration – real-time rendering, audio system, input handling
- Advanced game mechanics – tetromino rotations, line-clearing algorithms
- Optimized memory management and performance tuning
- Demonstrates full mastery of game development fundamentals
